Personal Profile

A solution-focused professional and a co-founder of a tech start-up that focuses on enhancing the development process through focused practices, I was awarded a full scholarship by Facebook for a front-end development degree at OpenClassrooms. Passionate about continuous learning and a keen interest in full-stack development with ample experience in developing innovative software solutions.

Skilled in balancing technical performance, seamless user experiences, and business and commercial targets. A team player who is dedicated to and passionate about delivering on targets set, hence delivering to the highest of standards while focusing on creating business value. Adept at problem-solving and handling the development process in an agile environment.

A public speaker, blogger, and frequent contributor to the community creating tech content at [Dev Diary By Dhanushka](#) & [Outpost Dev](#). Speakings and past writings can be found on [dhanushka.dev](#).

Academic Qualifications

Bachelor in Front-end development

OpenClassrooms [Jan 2019 – Dec 2019]

B.Sc. (Hons) in Software Engineering

University of Colombo School of Computing
Sri Lanka
[Feb 2014 – Jan 2018]

Awards and Recognitions

AWS Solution Architect Associate (Mar 2021 – Mar 2024)

Front-end development scholarship in the scholarship program by Developer Circles from Facebook - 2018

The best final year project (Software Engineering) Soma Goonatilake Memorial Award- 2017

NBQSA Gold award (Business Category - Tertiary) – 2014

Technical Skills

Languages

JavaScript, TypeScript, Java,
Python, Ruby

Frameworks

React, Angular, Vue, Node.js,
Spring, Ruby on Rails

Databases

MySQL, MSSQL, PostgreSQL,
MongoDB, Firebase

Career & Activities

(Senior) Software Engineer, JUST Eat Takeaway.com [Jun 2023 - Present]

Technologies: Java, React, Git, Github Actions, Microservices, Typescript

Software Engineer, Doctolib GmbH [Jan 2022 - Jun 2023]

- Leading and developing team-level improvements while achieving team KPIs and domain level development goals.
- Write Effective and feature-centric unit tests and e2e tests.
- Design and implement features from front-end to back-end complete flows with REST APIs and effective and minimal front-end components.
- Develop an internal application to view and manage company & product jargon with search functionality to improve the accessibility across different domains and new joiners as a pet project, then handed over.
- Contribute to team level solution designing that increases awareness of technical aspects of the development process by implementing application logic with well-designed development components.

Technologies: Ruby on Rails, React, PostgreSQL, Git, Github Actions

Technical Lead, Cambio Software Engineering [Aug 2021 - Oct 2021]

Associate Technical Lead, Cambio Software Engineering [Aug 2020 - Aug 2021]

Senior Software Engineer, Cambio Software Engineering [Aug 2019 - Aug 2020]

Software Engineer, Cambio Software Engineering [Jan 2018 - Aug 2019]

- Lead several projects and improvements while handling the technical phase of the business domain and guiding the team to achieve time-critical tasks in the optimal timeframe.
- Guiding teams to get into new technologies by clearing up the technical barriers through tech sessions and learning methods.
- Designed API agreements using swagger and considering the business model of the domain to completely convert the business domain into a REST representation in the spring context that achieved the project completion with higher standards.
- Worked on company-level improvements for front-end development technologies and practices.
- Worked in an agile environment with scrum methodology to achieve high product quality between both backend and front-end while maintaining stakeholder satisfaction.
- Contributed to team level solution designing that increases awareness of technical aspects of the development process by implementing performant application logics and well-designed components.

Technologies: Java, Spring, Swagger, MSSQL, Angular , Material UI, Node.js, Jenkins, Git

Projects

COVID-19 Sri Lanka Tracker

[Feb 2020 - Feb 2021]

Covid-19 SL Tracker

A COVID-19 stats tracker for display the analysis of the status of the Sri Lanka.

techtalkfeedback - A platform to send feedback after tech talk

[Jan 2023 - Present]

A platform where tech speakers can join and create publicly viewable pages to display feedbacks they have received from tech talk participants.

Framework for Linguistic Application Development (Final Year Group Project)

University of Colombo School of Computing [2017]

FLAD is an application platform to works as a middleware controller for creating, integrating and maintaining services for linguistic technologies such as TTS, STT, OCR and translation.

ta.lk – A Public Complaining System (Group)

University of Colombo School of Computing [2014]

Public Discussion Forum to discuss and solve problems which the general public faces.

Community Engagements

Founder at Outpost Dev (a tech community)
[2022 - Present]

Community Lead at Meta Developer Circle: Colombo
[2021 - 2023]

Community Lead at Free & Opensource community Sri Lanka (FOSS.LK) [2021 - 2023]

Tech Mentor at [MentorColor](https://MentorColor.com)
[Nov 2021 - Present]
